- + **Note:** CVs must be submitted in English

Responsibilities

- + Develop and maintain backend components for cloud-based applications
- + Design application architecture and APIs, choosing suitable approaches for the requirements
- + Provision and maintain cloud infrastructure components on AWS using Terraform
- + Select appropriate AWS services for given requirements and account for fundamental cloud networking concepts
- + Contribute to frontend development as needed
- + Apply basic internet security mechanisms and principles, including TLS, CORS, CSRF and XSS considerations
- + Where relevant, help design secure, performant and reliable system architectures, plan integrations between components and select technologies
- + Where relevant, contribute general knowledge of AI/LLM concepts such as RAG, vector databases and prompt injection

Experience & Knowledge Required

- + At least **5 years of professional experience; 10 years or more** is preferred
- + Strong python backend development experience, including application architecture and API design

- + Proficiency with **AWS and Terraform**
- + Experience in at least one project provisioning and maintaining cloud infrastructure components
- + Ability to select appropriate AWS services for given requirements and a basic understanding of cloud networking
- + Initial experience in frontend development (VueJS)
- + Basic knowledge of internet security mechanisms, including TLS, CORS, CSRF and XSS
- + English at **C1 level**, with the ability to communicate fluently in business and negotiation contexts, including under pressure
- + Ability and willingness to travel to Frankfurt am Main once per month

Preferred

- + Approximately 5-**10 years or more** of professional experience
- + Python experience
- + Vue.js experience
- + Experience designing secure, fast and reliable system architectures, planning component integrations and selecting suitable technologies
- + General knowledge of AI/LLM technologies, for example RAG, vector databases and prompt injection

To be considered for the role, please provide your hourly rate and your CV in English.
