

100% Remote-Cybersecurity Expert – Wiz, AWS & Azure

Cybersecurity Expert – Wiz
Engagement: Full-time, freelance
Location: 100% remote possible
Working language: English
Start: ASAP
Duration: Long term

About the role
A client is looking for a Cybersecurity Expert with hands-on experience implementing and integrating Wiz in customer environments. You support cloud security initiatives across AWS and Azure, including the rollout and configuration of Wiz components, security integrations, automation.

Responsibilities
- Implement, connect, and configure Wiz in customer environments, including Projects, RBAC/SSO, Attack Surface Management (ASM), workflows.
- Support Wiz sensor and Wiz broker rollouts in cloud, Kubernetes, and VMware environments.
- Work with cloud security capabilities across AWS and Azure, including IAM, networking, and logging.
- Integrate Wiz with SIEM and ticketing platforms, such as Microsoft Sentinel, ServiceNow, and Jira.
- Develop or maintain scripts and infrastructure-as-code solutions to support deployments and integrations.
- Collaborate with the nearshore team and client stakeholders in English.

Mandatory requirements
All of the following skills are required:

- Practical experience with Wiz in customer projects, including integrations, Projects, RBAC/SSO, ASM, and workflows.
- Strong knowledge of AWS and Azure, including IAM, networking, and cloud logging such as CloudTrail, Entra ID, and flow logs.
- Basic knowledge of Kubernetes, including Helm and DaemonSets, and VMware, particularly in the context of deploying Wiz sensors a broker.
- Experience with SIEM and ticketing integrations, including Microsoft Sentinel and ServiceNow and/or Jira.
- Scripting and Infrastructure as Code experience with Python and Terraform.
- Professional working proficiency in English.
- Availability for a full-time engagement starting ASAP.

Preferred qualification
- Wiz Certified Professional certification.
